MEDICAL DEVICE SOLUTIONS:

Applied Medical Technology, Inc. (AMT) is a global leader in the development, design, and manufacture of enteral feeding devices, and accessories.

We continue to introduce innovative products and materials, designed to increase patient comfort while improving patient outcomes. In our state-of-the-art facility near Cleveland, Ohio, we believe in manufacturing the highest quality medical devices to meet the needs of our customers and patients.

AMT has been a pioneering force within the medical device market, revolutionizing the standard of care for both pediatric and adult patients. Our Founder/CEO, Dr. Picha, co-invented and manufactured the first low profile gastrostomy button, changing the enteral nutrition community forever.

Over time, AMT's product portfolio has evolved to include nasal tube retention systems, innovative solutions for paediatric jejunal feeding, safe tube securement options, bowel management, and a complete line of ENFit® products.

Bridle Pro®

AMT Bridle™ Nasal Tube Retaining System Family

An AMT Exclusive. The New Standard of Care.

1 Flexible Tubing

Easy to clean and comfortable for patients.

2 Alignment Markings

Assures device alignment for proper placement.

3 Pre-Attached Clip

Improved patient safety and improved handling.

4 Ease of Placement

Magnets at the distal end help facilitate a quick and easy connection.

Bridle Family Clips

Clips accommodate several nasal tube sizes.

Capsule Non-Balloon Kit: Removal T-Handle

Traditional G-Tube, Balloon

Adjustable Length Gastrostomy Tube

Adjustable External Bolster

Can accommodate various stoma lengths and has stabilizer feet that allow for air flow.

Traditional G-Tube, Balloon

Adjustable Length Gastrostomy Tube

Reduce Leaks

- Exclusive AMT Balloon expands horizontally to provide superior stoma coverage.⁷

Improve Comfort + Safety

- Balloon protects the distal tip of the tube, lowering the risk for gastric ulceration.
- Enhanced External Retention Ring minimizes contact and allows skin to breathe.

Ease of Placement

- Often placed in the office or on-site.
- Tapered tip design for easier placement.
- Guidewire compatible.
- Radiopaque for x-ray confirmation.

Mutually Exclusive Ports Leading the Way in Patient Safety

Accidentally feeding the stomach instead of the jejunum can be dangerous! Mutually exclusive **GASTRIC** and **JEJUNAL** ports are designed to reduce the risk of misconnections. Different feed/extension sets are required for each port, so it is imperative to maintain adequate stock of both sets. Always remember to **Feed the Green!**

Complete **GASTRIC** set offering found on pages 32-33 and complete **JEJUNAL** set offering

MiniACE® Enema Button

Low Profile Antegrade Continence Enema Button

A New Standard of Care in Bowel Management
The Only FDA Cleared Balloon Button Device for ACE Procedures

1 10F Tubing

Minimizes stoma dilation associated with conversion from other devices to MiniACE®.

2 Exclusive AMT Balloon

Apple-shaped, expands horizontally to create a superior seal which is designed to reduce leakage.¹³

3 Protected Tip

Balloon bolster internally shields the patient with its soft silicone design, protecting the cecum.

The Difference is Clear:
